Subject: F-1 and J-2 Engine Parts at MSFC

As I mentioned to you last week, MSFC still has a large number of F-1 and J-2 engine parts that are in our warehouse storage. We are trying to determine what this actually consists of and would appreciate help from you. I have been told it appears to be a couple of big truck loads. I am forwarding on to you the listing of parts provided to me so that from the part numbers you may be able to see what components and parts are here.

A handwritten signature in cursive script, appearing to read "J. Thomson".
